

# Build THE Change Tuesday Competition

The Day and the LEGO Group are challenging 8-13-year-olds to explore the sustainability issues affecting our habitats and come up with creative solutions for the future.

## Enter by 15th December for your chance to win:

- An awesome LEGO treehouse!
- £2,000 for the school to spend on a biodiversity project!
- The chance to present their creation to a group of influential decision-makers in the field of sustainable design!
- A certificate.

*Follow these steps to enter - in step one choose your challenge, or complete all four for a bonus prize!*

### Step 1

#### Create a rooftop space for nature to flourish

In order to protect wildlife, we must be able to live alongside it. In this challenge, you will design a rooftop space above your classroom for nature to flourish.

#### Design an island paradise for vulnerable animals

Birds face a lot of threats, from weather changes to the destruction of grassland. In this challenge, you will design an island paradise for these vulnerable animals.

#### Create an underwater habitat

Inventors are making plans for underwater cities. In this competition challenge, you will design your own underwater habitat to live in.

#### Design an eco-friendly home in the forest

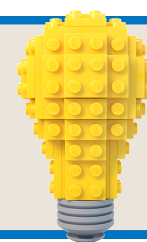

Thousands of different animals live in forests across the world — but so do humans. In this competition challenge, you will design your own eco-friendly home in the forest.

### Step 2

#### Think about the design

Get students to think about the features of their habitat and what makes it sustainable or eco-friendly. Whether it's the type of habitat they're building, flowers to attract bees or how they'll make it comfortable - now's the time for their creative ideas to shine.

### Step 3

#### Get building

Whether your students use LEGO bricks, creative materials (from paint to card to toilet rolls) or even just draw their design, they can bring their idea to life. If there's no time in class it can be set as homework - just print copies of this leaflet!

### Step 4

#### Enter the competition

Simply take a photo of the finished design and head over to our LEGO gallery, where a grown-up can quickly make a LEGO account and upload your students' designs with a short 200 word description before 15th December 2022!

### TIPS

- What positive impact does the habitat have on society or the planet?
- How imaginative and creative is your design?
- How much effort has gone into the artistic creation of your design?
