

The world this week
Clean energy

Where are we this week?

This country begins with a 'G'

It's in Europe,
near Bulgaria.

Its national
animal is a
dolphin!

It is Greece!

It's on the Mediterranean Sea and has a population of 10.5 million.

Its capital city is Athens.

UTC +2 hours

Yassas!

Why is Greece in the news?

Because last Friday, for the first time ever, all of the country's energy came from...

...only renewable sources!

Greece is trying to rely less on fossil fuels and more on clean, renewable energy sources, such as sun, wind and water.

Greece has many wind turbines, solar panels and dams...

...which provided almost half of its power this year!

Over to you!

Using the world map, where is Greece in relation to the Tropics and Equator? What do you think the climate is like?

Do you know any facts about Greece?

Is renewable energy better than fossil fuels? Why?

Over to you!

What else can countries do to be more sustainable? What could you personally do?

Thank you!

***We'll see you next week for your new
"The World This Week" resource!***
